## ¿Qué es Innova?

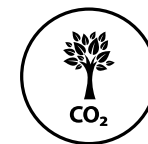

Solución de cabinas de baño antimicrobianas, fabricadas en laminado de alta presión compacto, grueso y macizo. Diseño y funcionalidad para baños y zonas húmedas, cabinas de sanitarios, duchas, vestidores u orinales.

Las divisiones pueden ser montadas de piso a pared o de piso a techo y ser niveladas durante el proceso de instalación. Ideal para centros comerciales, aeropuertos, universidades, colegios, hospitales y restaurantes, entre otros.

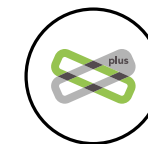

## Características

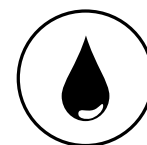

Productos certificados

Impulsados por la  
**neutralidad en carbono**

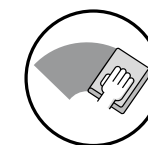

Tecnología **antimicrobial**

Resistente a la humedad

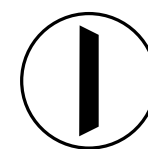

Alta resistencia al impacto

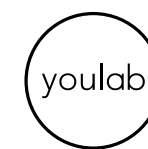

Fácil limpieza

Material inerte que previene  
el desarrollo de hongos

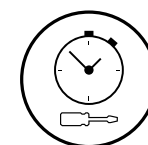

Material autoportante,  
no requiere sustrato

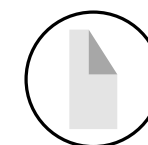

Personalizable mediante  
impresión digital YouLab

Disponible en nuestra  
amplia línea de diseños

Instalación rápida

Diseño doble-cara

Resistencia al fuego

Nuestra amplia gama de HPL contiene agentes antimicrobiales recubiertos en esferas de vidrio eliminando las posibilidades de lixiviación o contaminación no intencional.

What is Innova?

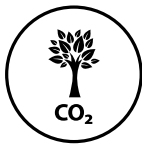

This antimicrobial shower partition solution is made from high-pressure laminate (HPL) that is compact, thick, and solid. It is designed for functionality in bathrooms and wet areas, and can be used for shower stalls, toilets, changing rooms, and urinals.

The partitions can be mounted from floor to wall or from floor to ceiling and can be leveled during the installation process. They are ideal for use in shopping malls, airports, universities, schools, hospitals, and restaurants, among other locations.

Features

Certified products

Driven by **carbon neutrality**

**Antimicrobial** technology

Moisture resistant

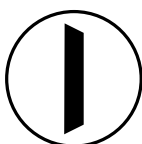

High resistance to impact

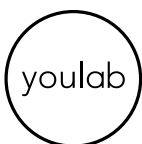

Easy cleaning

Inert material that prevents the development of fungi

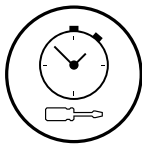

Self-supporting material, no substrate required

Customizable by YouLab digital print

Available in our wide range of designs

Quick installation

Double-sided design

Fire resistance

Our wide range of HPL contains antimicrobial agents coated on glass beads eliminating the possibility of leaching or unintentional contamination.
